Proposed Rate Design

• Establish initial PCE generation rates that are 5% below currently applicable PG&E generation rates.
  • Targeted rate savings of 5% as measured across all PCE rate classifications.
  • Comparison to be based on the sum of the PCE generation rate and applicable PG&E customer surcharges (Power Charge Indifference Adjustment and Franchise Fee Surcharge).

• PCE Rate = (1-.05)*PG&E Generation Rate – PCIA – FFS

100% Renewable Energy Option

- Requires incremental renewable energy equal to 50% of participating customers’ usage
- Rate designed as a premium to the standard PCE rate schedule to cover the incremental cost relative to the default service offering
- $0.01 per kWh premium would allow for incremental renewable energy supply using bundled renewable energy products

- PCE figures include PG&E surcharges.
- PG&E 30% reflects PG&E’s 2015 renewable energy content; 50% and 100% include corresponding “Solar Choice” program premiums.
- Figures do not include PG&E delivery charges, which will not change for customers joining PCE.
Future PCE Rate Changes

• Adopted rates to apply until changed by PCE Board.
• Rates to be evaluated annually for possible adjustment due to changes in PCE budget or other policy decisions.
• May recommend adjustment for 2017 if necessary to maintain competitiveness relative to PG&E service.

- Assumes phased enrollments per Implementation Plan.
- Actual results may vary based on customer participation and usage, final contract prices for energy, budgetary and rate decisions and other variances.
Recommendation

• Adopt proposed rates set forth in Attachment A, effective July 1, 2016.
8. Adopt a Resolution Authorizing the Chief Executive Officer to:
(A) Execute the Phase 1 Confirmation Agreement with the Energy Service Provider selected by the Chief Executive Officer Executive Director with terms consistent with those presented, in a form approved by the General Counsel and for a term of up to 51 months subject to the conditions that the binding final prices received from the selected Energy Service Provider are at or below a level that will (1) permit PCEA to deliver power to its customers at rates that are less than PG&E’s currently effective rates (as of June 23, 2016), net of the currently effective Power Charge Indifference Adjustment and Franchise Fee surcharges; and (2) that the PCEA rates referenced above are anticipated to be sufficient to recover all projected power supply expenses, other program operating expenses, scheduled debt service, and yield a rate stabilization reserve of no less than 5% of projected revenues for the twelve month period from October 1, 2016 through September 30, 2017;
(B) Execute a Master Agreement with terms consistent with those presented, in a form approved by the General Counsel with each of the three short-listed Energy Service Providers; and
(C) Execute an Intercreditor and Collateral Agency Agreement, Security Agreement and Deposit Account Control Agreement with Wilmington in a form of agreement approved by the General Counsel and transfer funds to Wilmington sufficient to meet contractual obligations under the foregoing agreements (Action)
