

2019 PROSPECTIVE PRODUCT CONTENT LABEL¹

Peninsula Clean Energy’s ECO100 option covers 100% of your electricity usage. In 2018 ECO100 will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New² Renewables in ECO100

Resource Type	Renewables	Generation Location
Solar	50%	California
Wind	50%	California
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying PG&E includes: Renewable (33%), Coal (0%), Nuclear (27%), Natural Gas (20%), Large Hydroelectric (18%), and Unspecified (2%). The generation data represents 2017 and is provided in the “Annual Report to the California Energy Commission: Power Source Disclosure Program.”

An average residential customer in the PCE/PG&E service area (San Mateo County) uses an 425 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-1 rate schedules for PG&E and PCE’s published rates as of March 15, 2018. Pacific Gas & Electric.
