Subject: PG&E Adjustment Trigger App (A.20-09-014)

Members of the Board,
Peninsula Clean Energy;

Please find attached, "Notice of Pacific Gas and Electric...application (A.20-09-014). I am hoping this item is not too late to be added to the meeting agenda for tomorrow, for some acknowledgement and possible consideration?

It appears to me, PG&E is about to penalize everyone with a 4% rate increase for their continued participation in, Community Choice Aggregation. I am writing to ask Peninsula Clean Energy to craft "Sample Language" in opposition to this approximately 4% penalty for using power from Peninsula Clean Energy.

It is not uncommon for a trade organization, lobbyist or other entity to craft "Sample" language for its constituents to use in direct email, phone or letter writing campaigns to further the best interests of the affected parties.

I was born and raised in California. PG&E has taken advantage of me for a lifetime! I am sure I do not need to get into details of all of the miss-steps and self-dealings that PG&E has engaged in over the years, at the expense of the people of California. Was it not PG&E's misbehavior that gave rise to Community Choice Aggregation?

There must be someone at Peninsula Clean Energy, with greater knowledge and expertise than me, to craft "Sample" Language with teeth? A blast email could be sent to everyone faced with a possible 4% rate increase. Rate payers could then forward "Sample" or "Sample" modified language to the California Public Utilities Commissioner (CPUC) in opposition to the proposed PG&E rate increase.

The sheer numbers of rate payers in opposition to a rate increase, could make a difference, especially if the pressure is maintained going forward, by never letting another PG&E rate increase proposal go unchallenged.

Sincerely,
Timothy A Makovkin,
65 year Resident of California
and current Resident of San Mateo County.

Where can I get more information?

Notice of Pacific Gas and Electric Company's request to change rates for its power charge indifference adjustment trigger application (A.20-09-014)

Pacific Gas and Electric Company

Why am I receiving this notice?

On September 28, 2020, PG&E filed its Power Charge Indifference Adjustment (PCIA) Trigger Application with the California Public Utilities Commission (CPUC). The application requests that the Commission authorize a \$253 million refund to bundled service customers who receive their electric generation, transmission and distribution services from PG&E, and a corresponding increase in the PCIA charge for customers that receive electric generation service from a third party and electric transmission and distribution services from PG&E.

If PG&E's application is approved, PG&E will collect \$253 million in rates from customers who receive electric generation service from a third party beginning in January 2021 and will simultaneously refund \$253 million in rates to bundled customers.

Why is PG&E requesting this rate increase?

The PCIA is a charge paid by most customers enrolled in a third-party electric generation service provider, such as a Community Choice Aggregator (CCA) or Direct Access (DA) provider. The PCIA is a charge to recover certain costs for energy purchases prior to a customer's switch to a third-party provider. In 2019, the PCIA undercollection balancing account (PUBA) was established to track the undercollection of the PCIA rate compared to the entire forecasted PCIA revenues. If the undercollection in PUBA exceeds a threshold, then PG&E is required to file an application to recover the undercollection in a timely manner.

PG&E is proposing to spread the increase for third-party customers over a 12-month period beginning in January 2021 to minimize the rate impact on those customers.

How could this affect my monthly electric rates?

For customers that receive bundled electric service from PG&E, meaning they receive electric generation, transmission and distribution services, a summary of the proposed rate decrease is provided below.

PROPOSED ELECTRIC RATE DECREASE

Customer Class	Current Average (¢/kWh) as of 8/1/2020	Proposed Average (¢/kWh) as of 1/1/2021	Total Change (¢/kWh)	Total Percentage Change
Bundled Service				
Residential	22.91	22.22	-0.69	-3.0%
Small Commercial	26.62	25.76	-0.86	-3.2%
Medium Commercial	23.72	22.97	-0.75	-3.2%
Large Commercial	20.69	19.99	-0.70	-3.4%
Streetlight	30.46	29.82	-0.64	-2.1%
Standby	18.48	18.06	-0.43	-2.3%
Agriculture	25.11	24.55	-0.56	-2.2%
Industrial	16.66	16.05	-0.60	-3.6%
Average System Rate Change	22.17	21.49	-0.68	-3.0%

Based on rates currently in effect, the bill for a typical residential customer receiving bundled electric service and using 500 kWh per month would decrease from \$127.40 to \$123.64 or -3.0%.

Direct Access and Community Choice Aggregation customers only receive electric transmission and distribution services from PG&E. On average, these customers would see an increase of 4.0%.

Another category of nonbundled customers is Departing Load. These customers do not receive electric generation, transmission or distribution services from PG&E. However, these customers are required to pay certain charges by law or CPUC decision. On average, these customers would see a decrease of -0.6%.

Actual impacts will vary depending on usage and are subject to CPUC regulatory approval.

How does the rest of this process work?

This application will be assigned to a CPUC Administrative Law Judge who will consider proposals and evidence presented during the formal hearing process. The Administrative Law Judge will issue a proposed decision that may adopt PG&E's application, modify it, or deny it. Any CPUC Commissioner may sponsor an alternate decision with a different outcome. The proposed decision, and any alternate decisions, will be discussed and voted upon by the CPUC Commissioners at a public CPUC Voting Meeting.

Parties to the proceeding are currently reviewing PG&E's application, including the Public Advocates Office, which is an independent consumer advocate within the CPUC that represents customers to obtain the lowest possible rate for service consistent with reliable and safe service levels. For more information, please call **1-415-703-1584**, email **PublicAdvocatesOffice@cpuc.ca.gov**, or visit **PublicAdvocates.cpuc.ca.gov**.

Your participation by providing your thoughts on PG&E's request can help the CPUC make an informed decision.
