

## Peninsula Clean Energy Now Providing 100% Emission-Free Power To All Customers

### *Critical step toward agency's ultimate goal of 24/7 renewable power*

REDWOOD CITY, CA – March 2, 2021 – Peninsula Clean Energy has begun providing 100 percent carbon-free electricity to all of its nearly 300,000 customers, which is well ahead of California's 2045 zero-emission power generation mandate and a critical step in helping the agency achieve its ultimate goal of providing all customers 100 percent renewable power on a 24/7 basis.

The agency is continuing to provide all of its customers with at least 50 percent renewable power in 2021 generated by solar, wind, biomass and small hydropower projects.

The remainder of the emission-free power will be provided from large hydropower and other carbon-free generation. None of that generation in 2021 will stem from nuclear power. The agency's 2020 power mix was 95 percent carbon-free.

Peninsula Clean Energy customers will continue to receive this clean power at rates lower than those charged by PG&E.

ECO-100 customers will continue to receive all electricity from wind and solar power.

"Congratulations to Peninsula Clean Energy for moving to carbon-free electricity," **said State Senator Josh Becker (D-Peninsula), vice chair of the Joint Legislative Committee on Climate Change Policies.** "California needs to speed its transition to 100 percent clean energy. That's why I introduced legislation calling for a 24/7 Clean Energy Standard to provide California with a stronger, swifter pathway to success. Peninsula Clean Energy's leadership is critical for the community it serves and our area, and provides me with a good case study I can take to Sacramento."

"Community-based providers are proving that we all can, and must, provide affordable and reliable emission-free power to our customers before it is too late to successfully mitigate climate change," **Peninsula Clean Energy CEO Jan Pepper** said. "We hope our experience can serve as a model for other power providers to follow here in California and beyond."

### **About Peninsula Clean Energy**

Peninsula Clean Energy is a Community Choice Aggregation agency. It is the official electricity provider for San Mateo County and, beginning in 2022, for the City of Los Banos. Founded in 2016 with a mission to reduce greenhouse gas emissions in the county, the agency serves 295,000 customers by providing more than 3,500 gigawatt hours annually of electricity that is 100 percent carbon-free and at lower cost than PG&E. As a community-led, not-for-profit agency, Peninsula Clean Energy makes significant investments in our communities to expand access to sustainable and affordable energy solutions. Peninsula Clean Energy is on track to

## NEWS RELEASE

deliver electricity that is 100 percent renewable by 2025. The agency has earned investment grade credit ratings from Moody's and Fitch.
