

Used EV Rebate Program: Eligible Vehicles

Types of eligible vehicles:

Plug-in Hybrid Electric Vehicles (PHEV) have both an electric motor and a gasoline engine. PHEV batteries are charged by plugging into a standard outlet or charging station. Usually uses electric range first, then switches to gas-electric hybrid mode.

Battery Electric Vehicles (BEV) operate solely on their electric motor. BEV batteries are recharged by plugging into a standard outlet or charging station.

Use the checklist below to see if the vehicle you're interested in qualifies for a rebate:

- Vehicle is a used PHEV or BEV (PHEVs must have a minimum 25-mile electric range)
- Vehicle is 8 model years old or newer (e.g., for 2021 = 2014 or newer)
- Vehicle cannot have a sale price above \$25,000 (excludes taxes, fees, warranties, or incentives; refer to Line 1-A "Cash Price of Motor Vehicle and Accessories" of Sale's Contract)
- Vehicle is purchased within 60 days of your rebate application approval
- Vehicle must be registered in your San Mateo County address

The tables below show electric vehicle make and models potentially eligible for the Peninsula Clean Energy Used EV Rebate Program. Note that a being on this list does not automatically make a vehicle eligible for the rebate. The vehicle purchased must additionally meet all the eligibility criteria listed above.

Plug-In Hybrid Vehicles (PHEV)			
Make	Model	Year(s)	Electric Range*
Cadillac	ELR	2014	37
		2015	
		2016	40
	CT6	2017	31
	CT6	2018	
Chevrolet	Volt	2014	38
