

# Energy programs for business and government

Peninsula Clean Energy provides 100% clean electricity at lower rates. As a not-for-profit agency, we invest earnings in programs that further reduce carbon emissions, support local jobs, and deliver savings and other benefits to the community.

## Electric vehicle (EV) charging incentives & technical assistance

Our EV Ready program provides \$28 million in incentives and technical assistance for the planning, design and installation of EV charging. The program is designed for workplaces, multi-family dwellings, colleges, public parking garages/lots, and other public locations.

## All-electric building technical design assistance and training

The Electrification Technical Assistance program offers project design assistance and training from leading technical experts to architects, builders, developers, design engineers, contractors, and energy consultants to meet existing and emerging all-electric building and electric vehicle requirements.

## Access or share your utility data

Data Connect provides free, secure, authorized access to energy data. If you are a large commercial customer, you can access your own data, and can also give permission to third-parties to receive access to your energy data. If you are a third-party energy program provider, you can use Data Connect to request permission to access energy data from Peninsula Clean Energy customers.

## Solar for public buildings

This program helps public agencies and school districts install solar photovoltaic and solar+battery backup systems on public facilities. A power purchase agreement (PPA) with Peninsula Clean Energy provides a fixed, economical price for electricity. There is no capital outlay for the site host or owner. Peninsula Clean Energy provides vendor selection and management at no cost.

## Local government support

We support local government initiatives to advance decarbonization in our community, such as: building “reach” code technical assistance and incentives ([PenCleanEnergy.com/reach-codes](https://PenCleanEnergy.com/reach-codes)); support for municipal climate action plans and energy management; and (soon) fleet electrification assistance.
