Subject: Rooftop solar Power generation plant at 1000000 Home at India.

To: <vshin@peninsulacleanenergy.com>

Vahin sin madam */ peninsula clean energy board members.

Hello

Yesterday I was read about New policy for indian solar Power generation system. 10000000 Home having rooftop solar system in India. India is huge sunlight soil land. Almost average sunlight is 10+ hours daily 325 days) maximum kWh is huge 6.1 to 7.45kwh. government electricity supply company is buy all these solar electricity from Home owners.

Home owners installed ev charging, for 4 & 2 wheels automobile. (achieving record sales of 1.5 million units in CY2023, has registered 11-month sales of 1.38 million units and handsome 50% YoY growth. report 30 November 2023.))

At our factory shade (150X350 feet shade area) with rooftop grow pot's for vegetable & berry fruit polyhouse. polyhouse is manege by retired agriculture University professor.)) we installed huge solar Power generation plant at our factory, werehouse, Home, farm house. sale all solar power generation selling to government electricity supply company.

In return we get free units from them every month.

It's amazing for kingdom government electricity supply.

And help to both government too.

Yes, it's help in electricity generation.

Citizen and State & local land officers must learn from others and help government.

Use un-visible security camera to helping police' department.
